

Build sight word fluency with the
Sight Word Fluency Builders

LIST A.1

Sight Word Fluency Builders

Description:

The sightwordtools.com Fluency Builders provide repeated practice with the sight words from an assigned set. Personal goal setting keeps students motivated as they attempt to read more words than were read during the previous session. The Fluency Builder can be done in three ways: Teacher/Student, Student/Student, or Parent/Student.

Materials Needed:

Fluency Builder page, timer, pencil or pen

Procedure:

- 1) Place Fluency Builder page in front of the student.
- 2) Explain that the words on the page are the same words the student has been practicing in his/her video lesson.*
- 3) Point to the first word on the first row.
- 4) Tell the student he/she will read across the rows (demonstrate with your finger) until the timer goes off.
- 5) Set the timer for one minute and instruct the student to begin.
- 6) Start the timer when the first word is read. If a word is read incorrectly, say "That word is _____. What is that word?" Wait for response, then instruct the student to move on.
- 7) When time has expired, count the number of words the student read correctly and record the wpm (words per minute) at the bottom of the page. Save the page to use in subsequent sessions.
- 8) When beginning the next session, review the student's previous wpm and challenge him/her to beat that "score".
- 9) Repeat steps 1-8 until the student can fluently read all words.

*Before assigning a Fluency Builder activity, students should be assessed using the sightwordtools.com Sight Word Assessment to determine the needed list and set for practice. The Fluency Builder activity is most effective when used in conjunction with the corresponding sight word video.

The form is titled "Sight Word Tools Fluency Builder List B, Set 1". It includes a "Student Name:" field and a "Monday Date:" field. Below these is a 6x6 grid of words: over, take, new, only, little, sound. The grid is repeated for each row. At the bottom is a "Practice Log" table with columns for Date, wpm, and a section for Date, wpm, and a section for Date, wpm. A small note at the bottom right says "160 Words Per Minute".
